CONTENTS VOL. 105, 1989

Research Papers

Analysis of streamflow generation following deforestation in southwest Western Australia
J.K. Ruprecht and N.J. Schofield (Perth, W.A., Australia) 1
A comparative evaluation of the estimators of the log Pearson type (LP) 3 distribution
K. Arora and V.P. Singh (Baton Rouge, La., U.S.A.) 19
Predicting pumping water levels in single and multiple wells using regional groundwater models
D.N. Lerner (Birmingham, U.K.) 39
Stochastic analysis of soil water regime in a watershed
J.W. Hopmans and J.N.M. Stricker (Wageningen, The Netherlands) 57
A physically based model for the agrohydrologic processes — Solute movement in soil
R. Al-Soufi (Avaruuskatu, Finland) 85
An accurate, relatively simple calculation of the saturation index of calcite for fresh to salt water
P.J. Stuyfzand (Nieuwegein, The Netherlands) 95
Numerical modeling of coupled heat and water flows during in a stratified bare soil — Comparison with field observations
A. Passerat de Silans (Saint Martin d'Hères, France), L. Bruckler (Montfavet, France), J.L. Thony and M. Vauclin (Saint Martin d'Hères, France) 109
Maximum likelihood estimation of the parameters and quantiles of the general extreme-value distribution from censored samples
H.N. Phien and T.-S.E. Fang (Bangkok, Thailand) 139
Changing ideas in hydrology — The case of physically-based models
K. Beven (Lancaster, U.K.) 157
Evaporation from Banksia woodland on a groundwater mound
P. Farrington, E.A.N. Greenwood, G.A. Bartle, J.D. Beresford and G.D. Watson (Wembley, W.A., Australia) 173
Sedimentation in the Illinois River valley and backwater lakes
N.G. Bhowmik and M. Demissie (Champaign, Ill., U.S.A.) 187
Bilan hydrique sur jachère et sol nu dans les régions semi-arides (Water budget on a fallow and a bare soil in semi-arid regions)
H. Daghari, M. Maâlej, Ch. Laroussi (Tunis, Tunisie) et L.W. Debacker (Louvain La Neuve, Belgique) 197

Review Paper

Turbulent transfer over snow and ice
E.M. Morris (Cambridge, U.K.) 205

Research Papers

Experimental and theoretical analysis of solute transport from a diffuse source of pollution
H.C. van Ommen (Wageningen, The Netherlands), M.Th. van Genuchten (Riverside, Calif., U.S.A.), W.H. van der Molen, R. Dijksma and J. Hulshof (Wageningen, The Netherlands) 225
Experimental assessment of preferential flow paths in a field soil
H.C. van Ommen, R. Dijksma, J.M.H. Hendrickx, L.W. Dekker, J. Hulshof and M. van den Heuvel (Wageningen, The Netherlands) 253

Prediction of solute breakthrough from scaled soil physical properties
H.C. van Ommen, J.W. Hopmans and S.E.A.T.M. van der Zee (Wageningen, The Netherlands) 263
Groundwater-discharge processes at a central Australian playa
G. Jacobson and J. Jankowski (Canberra, A.C.T., Australia). 275
Spatial structure of rainfall in mid-latitude cold front systems
C. Corradini and F. Melone (Perugia, Italy) 297
Rainfall interception by bracken in open habitats — Relations between leaf area, canopy storage and drainage rate
J.I. Pitman (London, U.K.) 317
Soil moisture and groundwater responses to snowmelt on a drumlin sideslope
J.M. Buttle (Peterborough, Ont., Canada) 335
On the relationship between the time condensation approximation and the flux–concentration relation
M. Sivapalan and P.C.D. Milly (Princeton, N.J., U.S.A.). 357
Remote sensing applications to hydrological modeling
C. Ottlé, D. Vidal-Madjar (Issy-les-Moulineaux, France) and G. Girard (Fontainebleau, France) 369
